High Definition Magic Eye

We would highly appreciate if you kindly High definition Magic Eye super-large visual angle smart and attractive and has everything outside the door come into your vision.

In built Doorbell

With practical and aesthetic value, it can be easily identified verified even at the night.

Heavy Duty Hinges

The door and their frame are connected with new type of hinges the opening angle can be freely opened such doors longevity are permanent and the performance or guarding against burglars is more predominant.

Reinforced Side-lock point

The thickened door leaf leaves the place for assense of reinforces side-lock, so timer and more durable.

Air-bay Seal

This kind of air-bay type seal,Seals the door better with effect to heat preservation all around insulation, noise reduction & No Vibrations.

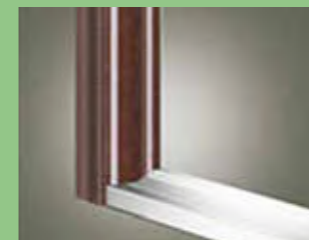

The Multilayer door frame

Thicken inflected frame doors have polyminate functions of anti-pry, sound isolation, thermal insulation and cold protection.

High-Quality Burglar proof Lock

Considering its safe reliability, we have developed new style lockset. The lockset has a unique effect of surface treatment, the door can be opened more comfortably and conveniently due to its unique handle design.

Stainless Steel Doorsill

Made of wholly stainless (304 grade), the door sill never after long term use therefore making your door foolproof forever.

Save Trees, Save Life and Earth

Dear sir

We may be excused for taking the liberty to write to you. We would not have been demanding on your precious time if the Environmental degradation had been at a manageable level. As things stand to- day; it is very unlikely that we might leave this earth livable,for our coming generations.

It is my sincere hope that we won't have to say, one day to our offsprings that there used to be TREES on this earth,but now we get oxygen from newly invented tech-trees as TREES have vanished,just as dinosaurs did!! We need to do something immediately to avert this impending disaster else the very survival of all living beings on earth will be under threat.

This is precisely the reason, we are writing to you, in the hope that you will appreciate our endeavours in saving this planet.

It is a common knowledge that deforestation is rampant across the world, in general and developing countries in particular .To arrest the reckless felling of trees, we have introduced imported eco-friendly steel doors so that we can make a humble beginning in saving this beautiful planet.

We would highly appreciate if you kindly consider eco-friendly steel doors rather than traditional wooden -doors ,while building your houses, we are sure that you will appreciate our efforts because you care for your family and environment.

Hoping for a lasting relationship

Warm regards

Ajay Khattri
